# ABOUT K & M NURSERY

***For over 20 years K&M Nursery has strived to grow florist quality plants for independent garden centers and nurseries.***

- Our customers want the highest quality and that is what we try to deliver.
- We only sell to Independent Garden Centers.
- We have grown to over 160 acres of production.
- We are adding more varieties of plants every year.
- We understand that to compete in today's marketplace you need beautiful plants at competitive prices.
- We know you need these plants while sales are hot.
- We offer Delivered Prices on our plants so you know your full cost.

## ABOUT OUR PLANTS

### Soil

Our soil is custom blended and contains only the highest quality Canadian peat. We don't try to cut costs with cheaper mixes.

### Fertilizer

All of our plants are grown with 100-180 day time release fertilizer so you won't be running out of it just when the plants arrive. This isn't the case with the quick release 30 day fertilizers that many companies will use.

### Liners

We do approximately 90% of our own liners. Since the cost is relatively inexpensive, we put twice as many liners in each container for many of the varieties. This makes for a much fuller plant.

### Spacing

All of our plants are given more than adequate spacing. Most of the flowering bushes and trellis have 4 square feet of spacing. The Boston fern hanging baskets have 6 square feet. This allows our plants to grow as big and full as possible.

### Contact

6321 Chickering Woods Dr.  
Nashville, TN 37215

Ph. 800.446.4769  
Fax 615.661.0490
